

MELCOO PROJECT

NEW REFRIGERANTS FOR AUTOMOTIVE INDUSTRY

NEEDS :

The MELCOO project is intended for the car industry. The objective is to conceive a new non-polluting refrigerant for the air conditioning system.

THE INNOVATIVE SOLUTIONS OF PROCESSIUM :

NEW HELP SOFTWARE FOR PROCESS DESIGN

- Identified the **physical constraints** of fluids and the **ecological, economic and safety** constraints
- Select product candidates with **predictive methods**
- Measure the **physical properties** of products
- Test products, Simulations on **bench tests**
- Validate the **performances** on vehicles

Partnerships : ADEME – CNAM – RENAULT - SPIREC

PROCESSIUM, A TEAM OF EXPERTS IN INNOVATIVE SOLUTIONS FOR THE ENVIRONMENT

- **Waste-water** treatment
- **Air** treatment
- Recycling of **solvents**
- **Eco-conception** of less polluting products
